

FACT SHEET: Abortion Access Now (AAN)

Hill Education Day

June 24, 2025

Abortion Access Now (AAN) is a campaign of nine leading reproductive health, rights, and justice organizations working together to expand abortion access nationwide. Our members include the: **American Civil Liberties Union (ACLU), Center for Reproductive Rights (CRR), In Our Own Voice: National Black Women's Reproductive Justice Agenda (IOOV), National Latina Institute for Reproductive Justice (Latina Institute), the National Asian and Pacific American Women's Forum (NAPAWF), the National Women's Law Center (NWLC), Planned Parenthood Federation of America (PPFA), Reproductive Freedom for All (RFA), and Unite for Reproductive & Gender Equity (URGE).**

We envision a future where abortion is not only legal but also accessible, affordable, and free from criminalization, stigma, or fear. Everyone should be supported in getting the care they want and need, no matter who they are, how much they earn, where they live, or where they come from.

To get there, Abortion Access Now is committed to advancing the most expansive policies possible, especially for those who were left behind even before *Roe v. Wade* was overturned in the *Dobbs* decision. **The AAN vision includes three pillars: a right to abortion throughout pregnancy; expanded coverage to eliminate cost barriers; and elimination of coverage barriers for immigrants.**

1. Coverage: Eliminating Cost Barriers to Abortion Care

The right to abortion means nothing without access. Even before the *Dobbs* decision overturned *Roe v. Wade*, abortion was not accessible for many people. AAN ensures that abortion is covered in federal health programs like Medicaid by permanently ending the Hyde Amendment, removing financial barriers, and ensuring that no one is denied care because of cost.

2. Restoring Access to Abortion Care for All

Even before the *Dobbs* decision overturned *Roe v. Wade*, abortion was not accessible for many people, especially immigrants. Immigrants are part of our communities. They are our neighbors, and when we all have equal access to healthcare, it lifts up all of our communities. AAN believes that access to Medicaid, Medicare, and other key federal health programs for lawful permanent residents (green card holders), DACA beneficiaries, and other federally authorized immigrants must be restored. AAN envisions that immigrants, who pay taxes and contribute to our communities, should once again have access to the same health care coverage, including abortion coverage, as everyone else.

3. Access Without Exception: Ensuring the Right to Abortion at Any Stage of Pregnancy

Every pregnancy is different, and every person deserves access to the care they need, when and where they need it, without arbitrary government interference. The current patchwork of different state laws will not solve the reproductive healthcare crisis we face—in fact, it allows for dangerous abortion bans and creates chaos and confusion about who can provide care and where care can be accessed. AAN believes in a guaranteed right to abortion care throughout pregnancy nationwide, ensuring that patients, not politicians, make decisions about their own healthcare. With a new federal right to abortion, we can strike down the state abortion bans enacted in the wake of *Dobbs* and the multitude of restrictions that made abortion care inaccessible for many, even before *Dobbs*.
